

## Operations sur les Arbres Binaires de Recherche:

```
28. bool isBST(struct NodeTree* tree);
29. struct NodeTree* find(struct NodeTree* tree, int value);
30. struct NodeTree* findMin(struct NodeTree* tree);
31. struct NodeTree* findMax(struct NodeTree* tree);
32. void insert(struct NodeTree* tree, int value);
33. void delete(struct NodeTree* tree, int value);
34. bool equivalentsBST(struct NodeTree* tree1, struct NodeTree*
    tree2);
```
